Locate This Well

Village:

Aliamu

Well Number:

RYM-108-DZ

Sub-County:

Drajini

Region:

West Nile  
Province

Country:

Uganda

Number of Users:

245

Project Started:

Nov. 11, 2020

Project Completed:

Nov. 22, 2020

Location:

N: 03.334842

E: 031.137009

Max Yield:

1000 lts/hr

Pump Installed:

India MK-II

Pump Depth:

30M

# Amaniyo Eunice

Twenty-five-year-old mother of two shared that they used to fetch from Kena Village when their borehole broke down. "Kena borehole is located one and a half a kilometer from our village, which is far. I am only able to fetch two jerry cans per day and they are not sufficient for my children and husband," Amaniyo Eunice narrated. She further said, "I would get tired because of the long distance. By the end of the day, I would be feeling pain in the legs and neck."

"After 4africa rehabilitated our borehole, I now enjoy the abundant water because it is near my home. I'm able to save time for other home activities like cooking food, washing clothes and caring for the children." She disclosed.

"As regards maintaining the borehole, we will sweep the surrounding and contribute money for the operation and maintenance of our borehole," Eunice said with confidence.

"I am so grateful to 4africa for rehabilitating our borehole. You helped us greatly, may God reward you abundantly," she concluded.

# Angupale William

My name is Angupale William. I'm thirty-four years old and a father of six children. I am the chairperson of Aliamu Central Community Borehole. I would like to begin by thanking 4africa very much for restoring our borehole back to normal.

When our borehole started making weird noises, we were unable to repair it. We sought the help of 4africa and they willingly came to our rescue. Some people were fetching from the valleys, others were fetching from the borehole in the other village, however, they were chased away or charged a lot of money, which is too much for an ordinary person, so they resorted to fetch from the valley.

The water from the hand dug wells is dirty as people step in it, animals drink from it and children play in it causing the water to be unfit for human consumption.

# Aliamu Community Well

Thank you for partnering  
with us to make a difference.

"...but whoever drinks of the water that I will give him  
will never be thirsty again. The water that I will give  
him will become in him a spring of water welling up  
to eternal life." John 4:14
